Product Data Sheet
Tape Light Driver

Triac Dimmable

Product Overview

The 40W and 80W Tape Light Drivers with 24V output are reliable and versatile power solutions designed specifically for LED tape lighting applications requiring smooth dimming and consistent performance. Operating at 120VAC input, these drivers are TRIAC dimmable, allowing compatibility with many standard wall dimmers to provide precise brightness control for residential, commercial, and architectural lighting installations.

Backed by a 3-year warranty, making them a dependable choice.

Main Features

- * Constant voltage output
- * Full-isolated, delivering up to 40W on the DVR40-24-TR and 80W of power on the DVR80-24-TR
- * Up to 80% efficiency protection for short circuit, over current and over voltage
- * Fireproof environmental protection PC plastic cover
- * 3 years quality warranty
- * Input Voltage Range: 100-130V
- * Input current: Constant Voltage
- * Output Current: 1650mA (40W) or 3300mA (80W)
On Load Voltage: 24V
