

**Certified LED Lights®**

Product Data Sheet  
Recessed Edge Lit

## Product Overview

This XEDXA recessed LED exit sign is a premium life-safety solution engineered to provide dependable emergency egress identification while maintaining a sleek, unobtrusive architectural appearance. Designed for recessed installation, the fixture integrates seamlessly into ceilings, minimizing visual impact while preserving clear and highly visible exit signage.

Its damp location rating allows it to be installed in areas subject to moderate moisture and humidity, such as covered walkways, vestibules, parking structures, and other interior or protected environments where damp conditions may occur. The durable housing and high-quality components are designed to provide years of reliable operation in demanding applications.

For emergency operation, the exit sign is equipped with a maintenance-friendly 4.8-volt long-life nickel-cadmium (NiCd) battery system that automatically supplies backup power in the event of a utility power failure. The battery is designed to provide a minimum 90-minute emergency illumination period, meeting the requirements of applicable life-safety and building codes. Integrated charging and monitoring circuitry help maintain battery readiness, ensuring dependable performance when emergency conditions arise. Combining code compliance, energy efficiency, durability, and a refined recessed aesthetic, this LED exit sign is an ideal solution for modern building emergency lighting systems.

## Applications

Schools

Offices

Commercial  
Buildings

Healthcare

- \* UL Listed
- \* Damp location rated
- \* Premium-grade, extruded aluminum housing
- \* Cover is easily detachable from below, providing accessibility for service or maintenance.
